

KN95 Foldable Mask

GB 2626-2006 Certified

This foldable and disposable KN95 mask is designed for home and professional use, providing protection against harmful particles and substances.

- **Adjustable noseband**
- **Flexible, elastic ear loops**
- **Lightweight and comfortable**
- **4 layers of protection**

Q. WHAT IS A KN95 MASK?

A. In summary, different countries use different codes and numbers to name their respiratory face masks.

- The N95 is the USA standard
- The KN95 is the China standard
- The KF94 is the Korean standard
- FFP2 is the EU standard. This includes the UK.

The most commonly known respirator rating is the NIOSH system, which rates masks as N95, N99, and N100. These masks are rated by the American National Institute for Occupational Safety and health, which is part of the CDC.

Q. Can I use a KN95 mask instead of an N95 mask?

A. The CDC suggests the KN95 is expected to be a suitable alternative to provide protection during the COVID-19 response when supplies are short.

CDC.GOV RECOMMENDATIONS

Use of respirators approved under standards used in other countries that are similar to NIOSH-approved N95 respirators

Other countries approve respirators for occupational use and approve respirators to these standards. These products are evaluated using some methods similar to those used by NIOSH, and some methods that are different, but are expected to protect HCPs. These respirators are expected to provide protection to workers. Those with equivalent or similar protection to NIOSH-approved respirators may be available to provide respiratory protection to workers exposed to harmful airborne particulate matter. These devices are expected to be suitable alternatives to provide protection during the COVID-19 response when supplies are short. All of these respirators have protection factors of at least 10 in the countries listed below, as outlined in the standards and guidance documents specified.
