Common Area Barrier

ModTruss^{INC}

Technical data sheet

**Expediting
Available!**

	Length	Width	Height
Dimensions	48”	48”	72”
Weight (Single Module)	30 Lbs		
Expansion Module	20 Lbs		
Material	PVC/ Polycarbonate		
Setup time	4 min per module		

Single Module \$ 485.24

Each Expansion \$ 325.18

5 Module package \$ 1,749.00

Sales Tax and shipping not included.

Features:

Easy Clean surface

Rigid and free standing

Simple assembly, all assembly tools provided.

Expandable and Modular to fit a variety of seating areas

Custom sizes and colors available.

Translucent or opaque.

Fire Retardance: Class A / CC1 Fire-Rated per ASTM E-84

***Product is for use in waiting areas for the purposes of reducing cross contamination between occupants.**

WE ARE ModTruss

Mod**Truss**, Inc. is a Wisconsin-based corporation created in 2014 and named for its Universal Building Component- Mod**Truss**. Founder/- CEO, Patrick Santini, has worked decades in the entertainment industry where he was constantly running into design and spatial challenges for stages and various entertainment sets. As a result, he designed and **patented** the ModTruss product (US patent 8,418,425).

Mod**Truss** is a structural building component that is universal to nearly any application. It is available for rental and purchase in multiple lengths of lightweight **aluminum** or robust **steel**. Mod**Truss** Inc. facilitates the engineering, promotion, sale, manufacturing, rental, and lease of the product line.

The Mod**Truss** name was taken from the word '**modular**' which is defined as "designed with standardized components for easy assembly and flexible arrangement". Mod**Truss** is **true** to that definition.
