

A MOBILE LIFT FOR BUSY HEALTH CARE ENVIRONMENTS

MaxiMove

MaxiMove®, the most complete mobile lift system available, is a proven success in health care environments around the world. Arjo has now enhanced *MaxiMove* to make it an even greater asset for health care settings of all types.

The fundamental aim of *MaxiMove* is to be “best on basics.” Using *MaxiMove* you gain a safer, more efficient solution for the basic tasks of patient/resident handling — lifting and repositioning.

The system offers two unique features, SVS (Stable Vertical System) and Powered DPS (Dynamic Positioning System), which together provide the safest, most comfortable basis for complete transfers — from the initial lift to effortless fine-tuning of the patient’s/resident’s posture.

This battery-powered passive sling lift allows a single caregiver to safely manage a wide range of patient/resident handling routines. With unrivaled flexibility, stability and reliability, *MaxiMove* is the best-equipped lift for intensive use in busy health care environments.

Flexibility for the diverse challenges of everyday care

There is no such thing as a typical patient/resident or a typical care facility. That is why *MaxiMove* has been designed as a complete system with the flexibility to provide patient-specific solutions in any health care environment.

An optimum solution for supine lifting of patients/residents

Rehabilitation sessions use the unique *Walking Jacket*

Reposition and turn patients/residents in bed

Good stability is fundamental for safe operation of the lift and the patient's/resident's sense of security during transfers. *MaxiMove* is based on a vertical lifting principle that assures excellent stability — SVS (Stable Vertical System).

A safe and easy way to position patients/residents in bed

Transfer patients/residents to chairs safely

Lift supine patients/residents onto stretchers

1 Scale

A built-in electronic scale shows the patient's/resident's weight on the display of the hand control.

2 Combi attachment

The Combi attachment enables easy interchanging between spreader bars and stretchers.

3 DPS and Powered DPS

DPS (Dynamic Power System) and Powered DPS minimize manual handling and improve precision.

4 Handset with screen

The user-friendly hand control has colored and illuminated screen.

Accessories

- Wide selection of spreader bars
- Wide range of special purpose slings and Flites®
- Stretcher solutions
- Optional: extended jib, scale (also available as an upgrade kit)
