INFECTION CONTROL

Maxi Sky 2 ceiling lift

Helping you minimize the risks and associated burdens of cross infection in ceiling lift transfers, the Maxi Sky® 2 Infection Control ceiling lift, enables you to take your patient handling capabilities to a new level.

NEW Maxi Sky 2 Infection Control¹

- Potentially decreases the likelihood of health care acquired infections
- Easy cleaning and disinfection process in health care facilities
- Compatible with most commonly used disinfectants
- Does not absorb dirt and contaminants

Independently tested using the four most common, hard-to-disinfect bacterial strains represented in health centers/hospitals:

- *Pseudomonas aeruginosa*
- *Staphylococcus aureus*
- *Escherichia coli*
- *Klebsiella pneumoniae*

Motor characteristics

Flexible Safe Working Load (SWL) up to 600 lbs (272 kg)

LCD display to monitor usage

Quick-Connect™ allows for multiple clinical applications

Non porous lifting strap

Enhanced Charging System (ECS)

Accessories

Scale

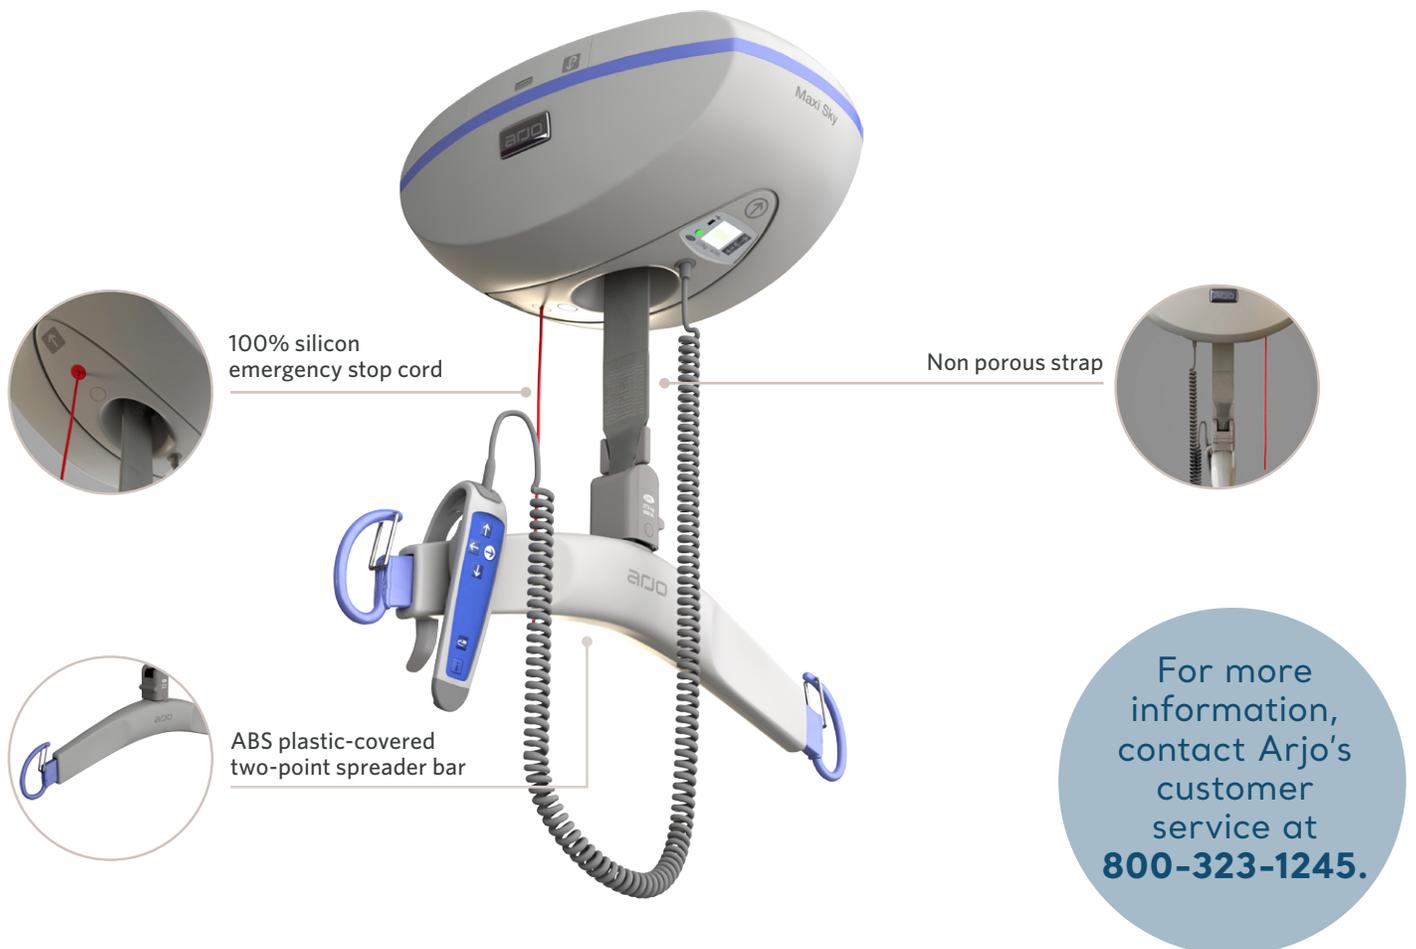

Infection control 2-point spreader bar

100% silicon emergency cord

Clear compatibility to disinfection products

Powered Dynamic Positioning System (DPS) capabilities

Key infection control features when tested against porous material used in conventionally constructed ceiling lift straps

1. An independent test facility (Toxikon, Massachusetts, USA). Study #100076787.
