

## Is Your Water Healthy?

Focusing on safety delivers results.

### Secondary / Supplemental Disinfection

- Chlorine Dioxide – DIOX Generators
- Monochloramine disinfection systems
- Water quality monitoring systems (VHA Directive 1061)

### Water Management Plans / Legionella Consulting

- Write and facilitate an ASHRAE/CDC/CMS compliant WMP
- Implement control measures for identifying high-risk areas
- Suggest industry best practices for remediation/disinfection

### Point of Use Filtration

- FDA approved .005 micron filtration device to retain waterborne pathogens (bacteria, virus, endotoxin)
- Filtration for sinks, showers, ice machines and medical devices

### Disinfection Techniques

- Hyper Halogenation / Thermal Eradication
- Project oversight & follow up HPC / Legionella testing
- Cooling tower cleanings

### Boiler Chemistry

- Steam purification
- Internal treatments
- Closed loop treatments

### Cooling Towers

- Scale and corrosion inhibitors
- Microbiocides
- Monitoring equipment

### Freedom Plus Hands-Free Delivery

- Automatic level sensors indicate when chemicals are low
- Trained specialist safely re-fills chemicals, hauls away drums
- Minimize spill risk, improve safety, eliminate handling

Watertech is  
more than a water  
treatment solution.

We have over 35 years  
of industry experience,  
helping companys  
minimize risk and  
improve water quality.
